

Amendments to published monthly reports – FY2023

03/10/2023 – The reported statistics for \$1 slot machines and for electronic table games was incorrect for the FY starting with July 2022 and ending with the original report posted for January 2023 for both Harrah’s Council Bluffs Casino & Hotel and Horseshoe Casino Council Bluffs. While the overall gaming revenue statistics for these casinos was correct, some slot machines were inadvertently categorized as electronic table games, which shifted the overall numbers for these categories. Each individual month report was corrected to reflect the correct statistical information, and future FY reports for this fiscal year also correctly accounted for the statistical information in these categories.
